Examiner's Amendment

During a telephonic conversation with Mr. Frederic J. Zimmerman (Reg. NO. 48,747), it was mutually agreed to amend the Application as follows:

IN THE CLAIMS

Claim 5, line 1, "for" has been deleted and replaced by - ***-embedded on a computer-readable medium with method steps of*** - - has been inserted.

Allowable Subject Matter

Claims 1 – 15 are allowed. The prior art of record fail to teach developing or predicting rocket motor ballistics performance at a user selected output temperature comprising, among other limitations, calculating an array of incremental values of throat dimension with a selected coefficient of throat erosion; calculating an array of linear web/incremental burned values at an input temperature with a selected reference burn rate; calculating an array of incremental values of burn surface at the input temperature with a selected velocity; using a measured pressure data in a predetermined throat diameter equation and varying coefficients until a calculated final throat diameter matches the actual throat diameter; using the measured pressure data in a predetermined web burned equation and varying a reference burn rate until a calculated web burned matches a user-input values for web burned – using the measured pressure data, calculated web burned, and calculated throat diameter to develop/derive/form a burnback profile of the rocket motor at an output temperature

selected by the user – wherein the rocket motor ballistic performance is predicted absent an actual propellant grain geometry.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yonel Beaulieu whose telephone number is (571) 272-6955. The examiner can normally be reached on M-W 9-3; F 9-4.
